

Elkalub products have many different uses & applications. Elkalub is a preferred lubricant for many well-known companies nationally & internationally.

- ◆ Print & Press Industry
- ◆ Paper Processing Industry
- ◆ Graphic Industry
- ◆ Plant Equipment Manuf.

- ◆ Pharmaceutical Industry
- ◆ Brewery Industry
- ◆ Packaging Industry
- ◆ Food Industry

- ◆ Tool Manufacturers
- ◆ Industrial & Machinery Ind.
- ◆ Mechanical & Robotics Ind.
- ◆ Automotive Industry

FLC 400—HIGH TEMP SPRAY

USES: fully synthetic special spray for the lubrication of metal parts in the high temperature range up to +250° C, short time +300° C.

GLS 595/N2—HIGH TEMP GREASE (H1) (KPKF 2U -40)

USES: high temp grease for lubrication of slow-turning plain & antifriction bearings for temps from -40° C up to 250° C

GLS 964/N2—GRIPPER SHAFT GREASE (H1) (KPHC2K-20)

USES: lubricating grease w/ good wear & corrosion protection properties. Designed for use in roller & slide bearings, especially for permanently changing directions of movement.

GLS 163—SPECIAL GREASE

USES: short-fibrous, green grease of an increased purity and a high resistance to pressure for use in roller and antifriction bearings.

GLG 16/N000—SPECIAL SEMI LIQUID GEAR GREASE (GP000F -20)

USES: High load carrying capacity & good sliding friction behavior e.g. embossing presses for hot process, slide ways, chains, bearings
SEE ALSO: GLG 16/N0 & GLG /N00

GLL 7/N3—MULTI PURPOSE GREASE FOR BEARINGS (KP3K-20)

USES: Long-term grease, resistant to oxidation & highly resistant to pressure. For lubrication of roller & slide bearings (under medium up to heavy loads) for temps from -20 up to +120° C.

LFC 1460H—HEAVY ADHESIVE OIL

USES: most suitable for lubricating areas w/ high centrifugal loss, e.g. chains (conveyor), open cogwheels gears & bearings in temp. range from -10° C to 120° C

LA 8P—CHAIN LUBRICANT

USES: Very adhesive lubricant for chains, high loads in places of lubrication necessitating a very good resistance against centrifugation. e.g. cam plates, delivery chains, open cogwheels, eccentrics & guide rails.
SEE ALSO: LA 8 & LA 8H1

FLC 1012—SPRAY FOR SLIDING FRICTION

USES: especially creeping special lubricant is of advantage e.g. for grippers & transport chains. Aging resistant, protects against corrosion & goes underneath water.

FLC 9010—SYNTHETIC OIL SPRAY (H1)

USES: slips into narrow gaps & slits. Ready for use w/ gear chains, joints, hinges, guides, gripper shafts of print machines, slide- & roller bearings. Rec temp. range: - 35° C till +160° C

GLS 135/N2—LITHIUM BASED SPECIAL GREASE (KP2K-20)

USES: protects against corrosion & can be used for roller & slide bearings in temp range from - 20° C to +120° C well conveyable in central lubricating systems

VP 785—OIL FOR CYLINDER BEARERS

USES: specially developed for the lubrication of cylinder bearings in printing presses. Offers a high protection against corrosion, does not lead to and has varnish dissolving properties.

Elkalub has a wide variety of PRODUCTS offering solutions for many different APPLICATIONS.

Adhesion Grease
Adhesive Grease for open gears
Adhesive No Drop Spray
Anti Corrosion Fluid
Anti Corrosion Spray (H1)
Assembly Grease EPDM seals (H1)
Assembly Paste
Chain Spray
Chain Spray (H1)
Chain & Bearing Grease (H1)
Chain Lubricant
Chain Lubricant (H1)
Cleaning Spray (H1)
EP-High-performance oil
Ester based Oil
Food Grade Grease
Food Grade Special Spray (H1)
Grease for Alum & Plastic

Grease for high loads (H1)
Grease for linear guides (H1)
Grease for Low Temperature
Grease for plastic gears
Grease for sliding friction
Gripper shaft grease (H1)
Heavy adhesive oil
High Performance Lubricating Oil
High Temperature Grease
High Temperature Grease (H1)
High Temperature Grease (H2)
High Temperature Spray
High Temperature Spray (H1)
Hydraulic Oil
Liquid Grease (H1)
Lithium based Special Grease

Li-Type Special Grease
Low noise special grease
Lubricating Concentrate
Lubricating Grease for Bowden cables
Lubricating Oil
Lubricating sliding Grease (H1)
Mechanic Spray
Metal Treatment Fluid
Mineral Oil adhesive version
Mineral Oil for rinsing machines
MoS2-Special Grease
Multi-purpose Grease
Oil for Industrial sewing machines (H1)
Oil form of lubricating grease (spray)
Oil PTFE-Spray
Oil Spray—food grade (H1)
Paraffine Oil (H1)
Partly synthetic Special Grease (H1)
Pneumatic Oil

Poly-Alpha-Olefines (H1)
Poly-Alpha-Olefines (H1-able)
Polyglycol Oil
Polyglycol Oil (H1)
R & S Chain Cleaning Spray (H1)
Rust Solvent Spray
Sealing Paste
Semi-liquid Grease (H1)
Silicone Grease for the food Ind. (H1)
Silicone Oil
Silicone Spray
Silicone Spray (H1)
Sliding (metal) Spray
Special Adhesive Grease (H1)
Special Gear Grease
Special Grease against fretting
-corrosion (H1)
Special grease enriched Oil (H1)
Special Grease for Bearings

Special Grease for oxygen fittings
Special Grease for plastic gears
Special Grease for roller bearings
Special Grease UV-installations
Special High Temp lubricating grease
Special lubricating Grease
Special Lubricating Grease (H1)
Special Oil for cylinder bearer
Special Semi-liquid Gear Grease
Special Silicone Oil (H1)
Synthetic High Temperature grease
Synthetic Oil Spray (H1)
Synthetic Special Spray
Universal bearing grease
Universal Gear Grease
UV-Fett Grease (H1)
.....and many other applications

We carry many other products for your printing needs!!

Check out our website where we have many other products to offer. We sell used printing equipment, parts & supplies for your printing needs! With 90 Years of Experience — Our Parts & Supplies Keep You Printing!
